2. Bodie, Z., Kane, A. and Marcus, A.J. (2018). Investments, 11th Edition, McGraw-Hill Education
ISBN: 9780077861674

Course Prerequisite:

Foundations of Finance
Statistics

Course Overview

This course covers the main contents in advanced portfolio management theories. You are suggested to have a basic knowledge of Foundations of Finance and Statistics. We will introduce the portfolio management process and investment policy statement firstly, and learn how to manage the individual and the institutional investor portfolios by case studies. Moreover, the asset and equity allocation approaches such as optimization, strategic or tactical allocation, and passive, active or semiactive equity investing methods will be introduced further as well as the alternative investment portfolio management. For the portfolio performance evaluation, we develop various measurement such as benchmarks, performance attribution and appraisal to help practitioner evaluate and identify the performance of different managers. Finally, we will study the provisions in the global investment performance standards which should be follow in industry. There will be one case study & presentation, one mid-term and final exam scheduled in this course. The presentation is scheduled on **Day 4**. The mid-term exam is on **Day 8** & Final exam on **Day 15**.

Learning Outcomes

- Analytical skills and an eye for details
- Ability to understand broader business issues
- Numerical skills
- Communication and presentation skills

Upon completion of this course, students should be able to gain:

- Describe the portfolio process and the investment policy statement
- Apply the approaches to manage individual or institutional investor portfolios
- Adopt the corresponding methods to manage asset and equity portfolios
- Identify, calculate, and interpret the fixed-income portfolio management
- Describe and apply the alternative investment portfolio management
- Identify and evaluate portfolio performance
- Understand the global investment performance standards
